

Integrated Project Controls

Saleh Elshobokshi

Project Controls Lead

Laing O'Rourke Australia

This will present a case study of how the team on the first Delivery Partner model infrastructure project in Australia took an approach to integrate processes and systems to form to a truly efficient management system. The presentation will touch on three main aspects that make this case a success; People, Process and Technology in context of digital transformation. The presentation will explore integrated project controls throughout Design, Procurement and Delivery of the A\$4.3bn project.

The presentation will also take the audience through real examples and demonstration of the technology used on the project.
